DETAILED ACTION

Claim Objections

1. The applicant's arguments regarding the objections to claim 17 were persuasive and the examiner traverses the objection of claim 17.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-29 rejected under 35 U.S.C. 103(a) as being unpatentable over Mikami et al (U.S. 5,704,031) and Day et al (U.S. Pub No. 2002/0147757 A1).

4. As per claims 1, 6, 11, 12, 13, 14, 15, 17, 18 & 24 Mikami disclosed a computer system comprising: at least one processor; a memory coupled to the at least one processor; an execution data collection mechanism residing in the memory and executed by the at least one processor, the execution data collection mechanism collecting execution data for the computer system (col.1, lines 59-67 & col.2, lines 1-5); an execution data transmission mechanism residing in the memory and executed by the at least one processor, the execution data transmission mechanism,

Art Unit: 2143

when enabled, transmitting at least a portion of the execution data to another computer system coupled to the computer system via a network (col.2, lines 11-37).

However Mikami did not disclose in detail about an execution data access mechanism residing in the memory and executed by the at least one processor, the execution data access mechanism allowing access to the execution data by a user of the computer system only if the execution data transmission mechanism is enabled. In the same field of endeavor day disclosed that client and server could communicate by means of requests and/or responses (paragraphs. 37 & 47).

It would have been obvious to one in the ordinary skill in the art at the time the invention was made to have incorporated access means by another computer as taught by Day to the computer system having execution data taught by Mikami in order to make the information available to another entity for analysis or record and thus making the system versatile.

5. As per claims 2 & 7 (Mikami-Day) disclosed the computer system of claim 1 wherein the computer system comprises a customer computer system and the another computer system comprises a vendor computer system (Mikami, col.1, lines 1-63).

6. As per claims 3, 8, 21 & 27 (Mikami-Day) disclosed the computer system of claim 1 wherein the execution data comprises data collected by an operating system residing in the memory and executed by the at least one processor (Mikami, col.1, lines 64-67 & col.2, lines 1-6).

Art Unit: 2143

7. As per claims 4, 9, 22 & 28 (Mikami-Day) disclosed the computer system of claim 1 wherein the execution data comprises data collected by a software application residing in the memory and executed by the at least one processor (col.2, lines 11-21).

8. As per claims 5, 10, 23 & 29 (Mikami-Farhat) disclosed the computer system of claim 1 wherein the execution data comprises data collected 2 by an analysis program residing in the memory and executed by the at least one processor (Mikami, col.2, lines 21-37).

9. As per claim 16 (Mikami-Day) disclosed the method of claim 15 further comprising the step of; (D) the customer computer system sharing the execution data (Mikami, col.3, lines 1-14)

10. As per claim 19 & 25 (Mikami-Day) disclosed the program product of claim 18 wherein the signal bearing media comprises recordable media (Mikami, col.3, lines 14-25 & col.4, lines 3-11)

11. As per claim 20 & 26 (Mikami-Day) the program product of claim 18 wherein the signal bearing media comprises transmission media (Mikami, col.2, lines 50-67).

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Wilson (U.S. 6,714,976) disclosed systems and methods for monitoring distributed applications using diagnostic information.

Yokoyama (U.S. PUB 2001/0029526A1) disclosed method for controlling a mobile agent.

Davis (U.S. PUB 2002/0099812A1) disclosed method and apparatus for tracking clients interaction with a network resource and creating client profiles and resource database.
